

Soil Health Seminar:

Implementing Regenerative Agricultural Principles

January 18-19, 2024- Riviera Theatre, Three Rivers, MI

Dane Terrill

Soil Health/Plant Health
Consultant—CSI

RJ Rant

Consultant—Nutralink BioSystems
Manufacturer—Terraform Ag

Ron Ward

Consultant/Co-Author
The Not-Toxic Farming Handbook

Bill McKibben

Consultant/Author
Grower's Guide for Balancing Soils

Join these Industry leaders for two days of invaluable knowledge and guided discussion on the background, science, and practical applications of *regenerative agricultural practices*. By sowing their seeds of knowledge, these industry leaders will ensure that attendees cultivate a deep understanding of the critical relationship in soil health:

Healthy Soil + Healthy Plants = Yields of Healthy Nutrient-Dense Food

Regenerative practices can be scaled to any size growing operation and are imperative to improve soil health, plant health and profitability while providing ecosystem services to improve water and air quality. The types of attendees that will expand their knowledge and gain confidence to implement these principles on their operations and in their professions are:

- ♦ Back-yard Gardeners/Consumers
- ♦ Organic & Conventional Row Crop Farmers
- ♦ Grass-fed and Pasture operations
- ♦ Turf/Landscape Managers
- ♦ Fruit and Vegetable producers
- ♦ In/outdoor Hemp and Cannabis production
- ♦ Greenhouse/Hoophouse Production
- ♦ Consultants/Educators
- ♦ Food buyers

**Pre-Registration is Required,
Call CSI or Register Online**
