

The Owl

A wide eyed owl (make fingers circle over eyes)

With a pointed nose (use fingers to make point)

Two pointed feathers (fingers on head)

And claws for toes (wiggle fingers like toes)

He sits in the tree (point to tree top)

And when he looks at you –

He flaps his wings (flap arms)

And he says whoo, whoo. (continue flapping arms)

(Tune: Round and round the village. Children fly around room)

Then the owl flies round the forest,

The owl flies round the forest,

The owl flies round the forest,

All night long.
