

# Witness Protection

A short TG story by Rebecca Molay

SEXUALLY EXPLICIT

For Adults 18+ Only!

- ▶ File XX-301/1 Statusreport  
December 3 2010
- ▶ A relevant subject has been identified. His name is Aaron Tyler. He has the profile we are looking for: introvert, shy, and having problems with developing relationships with the opposite sex.
- ▶ He is a witness in the Marleone case, and will need a new identity after the court trial, as a revenge through assassination by the mafia is very likely.

- ▶ File XX-301/4 Statusreport  
January 4 2011
- ▶ Aaron Tyler is now in hiding in one of our safe houses in S-343. He is very scared of the mafia an has accepted an “advanced identity replacement experiment”, although he has not been informed of all its implications.
- ▶ Special Agent Nox has installed the experimental subliminal hypnosis system in his bedroom and replaced his vitamin supplements with Prototype A hormonal treatment.

- ▶ File XX-301/7 Statusreport  
April 3 2011
- ▶ The Aaron Tyler experiment is going according to plan. The subject is displaying more feminine behavior and emotional patterns. He has developed small tits, A cup, which he tries to strap down with bandages. The behavioral treatment is expected to lead to a stronger acceptance of his feminine role. SA Nox suggests a gradual replacement of his wardrobe.

- ▶ File XX-301/13  
Statusreport December 5  
2011
- ▶ The subject displays  
advanced feminization. He  
is no longer using male  
clothing and keeps his hair  
long. SA Nox has  
instructed him to live a life  
as a woman under a new  
identity: Erin MacAllister.  
She is now studying at  
another university to  
ensure acceptance and  
behavioral reinforcement  
from fellow students.
- ▶ She has on her own  
initiative started using  
make up.

- ▶ File XX-301/17  
Statusreport January  
17 2012
- ▶ SA Nox reports of a  
significant  
breakthrough earlier  
this week, as the  
subject initiated a  
relationship with her  
male Pilates trainer.

- ▶ The following footage proves that Erin now fully takes on the role of a woman. The recording shows how she submissively encourages his lover to penetrate her.

- ▶ The subject no longer has normal erections, and her pleasure seeking behavior is more focused on continuous penetration and stimulation. A romantic setting has been known to cause multiple orgasms. SA Nox recommends final surgery.

- ▶ File XX-301/21 Status report March 5 2012
- ▶ The hormone treatment has caused the subjects breasts to reach a D cup by natural means. Breast enlargement is therefore not necessary.
- ▶ A surgical construction of a fully functioning vagina is set to April 2.

- ▶ File XX-301/23 Statusreport  
November 15 2012
- ▶ On November 2 the subject  
experienced her first regular  
vaginal penetration. Our  
analysis indicates that she  
now prefers this to anal sex.

- ▶ File XX-301/27  
Statusreport December 15  
2012
- ▶ The subject has lately  
displayed great  
enthusiasm for fellatio.  
Instincts from deep  
subconscious feminine  
layers have been activated  
and we consider the  
transition to have been  
completed.
- ▶ We recommend that this  
practice is included in the  
FBI and CIA manuals for  
witness protection and  
identity reassignment.
