

Galaxy NDAA Compliance Statement

National Defense Authorization Act

To address a perceived cyber-security risk, an interim final rule of the National Defense Authorization Act (NDAA) for the Fiscal Year of 2019 was made effective on August 13, 2019.

Section 889 contains the prohibition on certain telecommunication and video surveillance services or equipment from specific vendors. It also contains several provisions that have a major impact on currently existing and future US government-related video surveillance deployments.

The NDAA ban extends to manufacturers in cases in which the video surveillance cameras or systems from specified vendors are offered under another manufacturer's brand name typical of OEM, ODM, and JDM relationships.

Galaxy Statement

Galaxy is committed to providing NDAA Section 889 compliant products. Our newest video surveillance line: **Pro-VS** series which does not have OEM, ODM, and JDM relationships with the named vendors in the NDAA.

Galaxy Compliance Product List will be regularly updated on our website.

The following Galaxy cameras and network video recorders (NVRs) which do not use or deploy critical components, nor include SoCs produced by NDAA banned component vendors, are compliant with the NDAA.
