

## Kitchen Faucet Instructions

### Tools Needed:

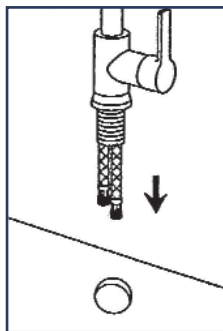

- Basic Handtools
- Phillips Adj. Wrench
- Bain Wrench
- Teflon Tape
- Putty/Silicone

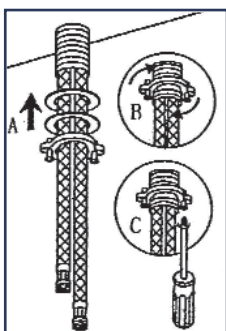

### Installation Instructions:

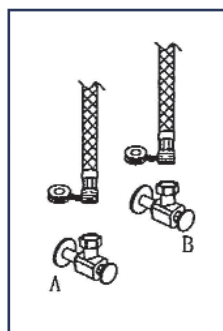

1. Remove the mounting hardware from the faucet.

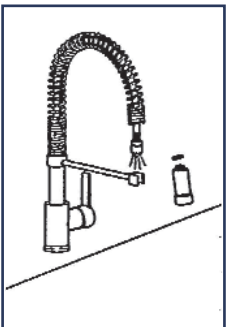

2. Install faucet through center hole.

3. Re-assemble the mounting hardware onto the shank, use the philips screw driver for the final tightening after the spout is aligned.

4. Connect to water supply.

5. After installing the faucet, remove spray assembly and open the hot and cold water supplies. Check for leaks. Turn on the faucet handle for one minute to flush debris from the faucet. Close the handles and re-assemble the spray.
