

NETHOPE

Who we are

NetHope helps nonprofits effectively address the world's most pressing challenges through collaboration, collective action and the smarter use of technology. Our community is made up of 65 of the world's leading humanitarian, development and conservation organizations, partnered with ground-breaking technology companies and visionary donors. Together, the NetHope community strives to transform the world, building a platform of hope for those who receive aid and those who deliver it.

What we do

Empower the underserved and provide relief and resources to the vulnerable. NetHope runs programs both with and for our Members. We provide essential connectivity in disaster situations; are at the cutting-edge of emerging technologies like AI and Machine Learning for nonprofits; help to provide connectivity and infrastructure for displaced communities; pioneer digital financial inclusion in developing contexts; work for the responsible and impactful use of data in the sector; and more.

NetHope has responded in a variety of disaster situations, including the Syrian refugee crisis, the Ebola outbreak in Africa, the 2015 Nepal earthquake, devastating hurricanes in the Caribbean and Bahamas, the Beirut explosion, and the coronavirus pandemic. Responses include: connectivity in refugee settlements and along migration routes; managed laptops to aid refugee resettlement; and crisis informatics and data visualization to equip aid agencies in emergency response. ([Visit our website](#) for more details about our work.)

The Center for the Digital Nonprofit brings together the expertise of the technology sector with the on-the-ground experience of nonprofits to create a foundation for forward-looking organizations to deliver aid, relieve suffering, and build hope. The Center believes that the growing needs of nonprofits can guide the responsible design of technology solutions, and that through technology and digital ways of working, nonprofits can increase capacity to achieve their mission with the same or fewer resources.

NetHope Members participate in our annual **Global Summit and regional Chapter Meetings and Working Groups** that focus on a host of relevant, timely topics. These groups work together and with NetHope technology partners to lift the capability of the sector as a whole, with context-specific and cross-organization problem-solving, training and over 30 webinars a year. Members also have access to collective impact grants that help to scale their impact, ranging from consulting hours to special pricing on technology from our partners.

You can join us

We can do more when we work together. NetHope Members together represent more than 60 percent of all annual, non-governmental aid delivered. We bring these amazing organizations together with leading technology companies to collaborate towards a single mission – using the promise and power of technology to help the world's most vulnerable people. **By joining with us, you can be part of the collective impact of NetHope Members.**
