

SILVER

SILVER Volume G

Silver Volume G is an additional Volume for Silver.

IMPORTANT:

It is mandatory that Silver be installed on your computer for the additional volumes to be used.

Make sure you have installed and authorised the Silver FREE player through the Aquarius Desktop application.

About Silver:

Silver is a suite of Acqua plug-ins consisting of three FREE players available in the following formats: VST, VST3, AAX, and AU, dedicated to emulating reverbs of physical spaces and sampled equipment.

Silver is an amazing project that has taken a long time to design and develop and has paid off considerably given the incredible results obtained; we think we have given birth to a new generation of cutting-edge reverb plug-ins.

Silver consists of:

1- Silver; the main FREE player (standard version) featuring fine-tuning controls, LP and HP filters, plus a three-band Eq applied to the reverberated signal. It contains, by default, four different emulated physical spaces—details in the following chapters.

2- Silver Mini; a ‘mini’ FREE version of the Silver player, which includes the same features as Silver except for the mid-band EQ and a smaller display than the main version.

3- Silver Lite; an alternative FREE version of the player that includes the same features of Silver but does not include the LP and HP filters and the three-band Eq.

Please read our User manual for further details about Silver (Product download, installation, authorization):

System Requirements

Modern computers are powerful enough to run many plug-ins at once. However, our technology requires more resources than algorithm-based software. Please, consider optimizing your system to work with high CPU loads and low audio latency.

All technical specifications of Acustica Audio products provided are intended to be estimates or approximations.

Due to numerous variables, no guarantees of compatibility or performance can be made.

The end-user is solely responsible for, prior to purchase, ensuring that the end-user's devices are compatible and meet the system requirements for Acustica Audio products.

(1) Case sensitive file systems are not supported.

(2) Intel i7/i9 X and Xeon processors need CORE 16 or superior. The CPU speed is more important than the number of CPU cores.

(3) In order to run more plug-ins instances it is always necessary to increase the amount of RAM.

(4) Each format needs three times more space than what the product is in order to download and decompress the installation files.

(5) Trial settings cannot be transferred from the trial to the commercial version.

(6) For others DAWs or NLEs, try trial before buy

(7) TCP/UDP ports 8080 and 443 should be open. Reliable and fast internet connection is recommended

(8) For Apple Silicon (ARM) computers, check compatibility before purchasing. AMD processors are not officially supported.

(9) For other operating systems, check compatibility before purchasing using the trial version.

IMPORTANT: Genuine Apple device with a valid serial number or valid volume ID on Windows operating systems is mandatory.

IMPORTANT: It is highly recommended to make a complete backup before making changes to your computer systems.

IMPORTANT: Acustica Audio cannot be held responsible for any loss or damage arising directly or indirectly

from any error or omission in this manual.

What you get

Silver Volume G includes **16 different emulations** from a vintage **Digital Reverberator** under the name/category '**Lace71**'.

NOTE:

-To facilitate understanding of the emulated hardware, where possible, we use product names used by an Acqua plug-in to aid in the identification of the original sampled unit.

-None of Silver's Volume G emulations are part of already released products; they are samples of hardware not included in the plug-in suites currently released by Acustica.

SPACES CATEGORY	IR
Lace71	(A-1 Concert Hall, A-2 Long Hall, A-3 Gym, A-4 Rich Chamber, B-1 Small Room, D-1 Tiled Room, D-2 Gated Chamber, D-3 Inf Rev, E-1 Rich Plate, E-2 Small Plate, E-3 Gated Plate, E-4 Let me go, E-5 Everybody, E-6 Extra 1, E-7 Extra 2, E-8 Extra 3).

Below we present all the emulations included in Volume G divided by 'PRESETS' Categories.

PRESET NAME	IR
Lace71	Under the 'Preset category' there are 4 different choices based on selected reverb type (Tiled Room, Rich Chamber, Gated Plate, Extra 3)

NOTE:

Please keep in mind that for Silver Volume G we recommend that you calibrate your input levels to: -18dBFS=0dBu. We suggest that you do not overload the input. This way you will avoid any unwanted distortion or unpredictable behavior due to excessive input levels.

LACE 71

Category: Lace 71

Preset: [Lace 71] Tiled Room, Rich Chamber, Gated Plate, Extra 3

Located: Oxygen recording studio – Verzuolo (CU) – Italy

Description

This great effect processor, well known for its classic sound, has been used by the world's top artists and recording studios and is still a benchmark and widely used to this day. It is a great sounding box for those who need a rich sound, lush, warm with grit and personality - all in a compact 19" rackmount unit in one space. Can definitely get 80s vibes if that's what you're looking for.

The sonic differences with other reverb units of the time were substantial, but great sounds are only half the story. The manufacturer of this model described it when it was launched as "unlike anything that has ever appeared before in an effects processor". The introduction of new selling points, such as Dynamic MIDI, made it a game changer, allowing it to be widely used and quickly becoming a reference product in many recording studios.

With Silver Volume G you have access to emulations of these incredible reverb!

NOTE: In addition to the intrinsic characteristics of the reverb, thanks to Acustica's technology you can also appreciate the harmonic distortion component of the unit in this emulation.
