“Natural supplements for Everyday Life”

What Are Nutraceuticals?

Nutraceuticals refer to any product derived from food sources with extra health benefits in addition to their basic nutritional value. The term “nutraceutical” combines two words – “nutrient” (a nourishing food component) and “pharmaceutical” (a medical drug).

The philosophy behind nutraceuticals is to “let food be your medicine” as declared by the Greek physician Hippocrates, who is also known as the father of medicine.

Nutraceuticals can be considered non-specific biological therapies used to promote general well-being, control symptoms and prevent malignant processes. Most often they are categorized as: dietary supplements, functional food, medicinal food, and farm-a-ceuticals.

We at Ancient Nutraceuticals currently specialize in dietary supplements: A product that contains nutrients derived from food products, and is often concentrated in capsule form. Although dietary supplements are regulated by the FDA as foods, their regulation differs from drugs and other foods.

ABOUT US

Ancient Nutraceuticals was founded with the primary focus of extracting natural nutrients hidden in nature and transforming them into supplements using modern methods that meet the highest standards.

OUR VISION

To be the premier innovative Nutraceutical company in the world.

OUR MISSION

To discover and bring together traditional herbal remedies with contemporary technology to engineer life enriching supplements to suit the habitual lifestyle.

WHAT WE DO

We bring ancient secrets right to your palm.

We produce ancient remedies from organically & naturally grown Sri Lankan spices and herbs using modern methods of extraction and processing, which enables us to produce these ancient recipes in a highly effective manner that is convenient to consume.

Busy schedules and hectic lifestyles mean that people have less time to focus on healthy living and nutrition. Our supplements make it easy and effortless to be healthier since they have been developed to be conveniently incorporated into one's day-to-day routine.

OUR PURPOSE AND OBJECTIVES

- *To use innovation and technology to identify and revive lost ayurvedic medicinal remedies and herbal goodness with the objective of significantly improving the wellbeing of humankind.*
- *To invent new remedies and medicines to promote health, wellness, and longevity.*
- *To provide natural solutions to modern lifestyle concerns.*

OUR VALUES

It is our deeply ingrained values that ensure we succeed in providing our customers with quality products and services that they deserve;

- *Commitment to customer satisfaction.*
- *Passion for innovation.*
- *Eye for quality*
- *Enthusiasm for high performance*
- *Environmental sustainability*
- *Concern for community wellbeing*
- *Collaborative mindset*
