Young readers will love the incredible photographs of a variety of butterflies, including monarchs, tiger swallowtails, and many more inside the pages of this book! With amazing facts and beautiful poetry written by Dr. Shirley Raines, this title delves into the life cycle of the butterfly and encourages an interest in nonfiction and science-based titles. Educators and parents will also find a variety of activities in the back of the book to encourage early learners to delve deeper into the topic and use what they have learned!

 fun facts,
 and verse

Dr. Shirley Raines has enjoyed a successful career in early childhood education. She began as a preschool teacher and finished her education career as the first female president of the University of Memphis. During that time, she authored seventeen books for teachers and avidly spoke and consulted for quality programs across the country. Teachers know her best for her Story S-t-r-e-t-c-h-e-r-s® series and recognize her as a widely regarded expert on teacher education and early childhood development and literacy. She currently serves on the Governor's Books From Birth Council, Dolly Parton's Imagination Library, and education foundations throughout Tennessee, and she continues to speak to educators, nonprofits, and professional associations. Shirley lives in Oak Ridge, Tennessee, with her husband, Robert Canady, and near her son, Brian, and two grandchildren, Riley Marie and Bryson.

Story S-t-r-e-t-c-h-e-r-s® expand the story and provide additional learning opportunities both in and out of the classroom. Each activity encourages young readers to become more involved with the material through activities focused on science, creative dramatics, social studies, art, and much more!

Curt Hart has been a professional photographer for over thirty-five years. He has photographed all over Tennessee, Mississippi, Arkansas, and Kentucky. As an instructor at the University of Memphis, Curt has a fondness for Strawberry Plains with its unique surroundings full of birds and butterflies. While he has been a sportscaster much of his career, Curt now enjoys being behind the camera lens documenting nature.
