

SILVER

SILVER Volume C

Silver Volume C is an additional Volume for the Silver Acqua plug-in suite.

IMPORTANT:

Silver (reverb) must be installed on your computer to use this additional Volume.

About Silver:

Silver is a suite of Acqua plug-ins consisting of three FREE players available in the following formats: VST, VST3, AAX, and AU, dedicated to emulating reverbs of physical spaces and sampled equipment.

Silver is an amazing project that has taken a long time to design and develop and has paid off considerably given the incredible results obtained; we think we have given birth to a new generation of cutting-edge reverb plug-ins.

Silver consists of:

1- Silver; the main FREE player (standard version) featuring fine-tuning controls, LP and HP filters, plus a three-band Eq applied to the reverberated signal. It contains, by default, four different emulated physical spaces—details in the following chapters.

2- Silver Mini; a ‘mini’ FREE version of the Silver player, which includes the same features as Silver except for the mid-band EQ and a smaller display than the main version.

3- Silver Lite; an alternative FREE version of the player that includes the same features of Silver but does not include the LP and HP filters and the three-band Eq.

Please read our User manual for further details about Silver (Product download, installation, authorization):

System Requirements

Modern computers are powerful enough to run many plug-ins at once. However, our technology requires more resources than algorithm-based software. Please, consider optimizing your system to work with high CPU loads and low audio latency.

All technical specifications of Acustica Audio products provided are intended to be estimates or approximations. Due to numerous variables, no guarantees of compatibility or performance can be made. The end-user is solely responsible for, prior to purchase, ensuring that the end-user's devices are compatible and meet the system requirements for Acustica Audio products.

(1) Case sensitive file systems are not supported.

(2) Intel i7/i9 X and Xeon processors need CORE 16 or superior. The CPU speed is more important than the number of CPU cores.

(3) In order to run more plug-ins instances it is always necessary to increase the amount of RAM.

(4) Each format needs three times more space than what the product is in order to download and decompress the installation files.

(5) Trial settings cannot be transferred from the trial to the commercial version.

(6) For others DAWs or NLEs, try trial before buy

(7) TCP/UDP ports 8080 and 443 should be open. Reliable and fast internet connection is recommended

(8) For Apple Silicon (ARM) computers, check compatibility before purchasing. AMD processors are not officially supported.

(9) For other operating systems, check compatibility before purchasing using the trial version.

IMPORTANT: Genuine Apple device with a valid serial number or valid volume ID on Windows operating systems is mandatory.

IMPORTANT: It is highly recommended to make a complete backup before making changes to your computer systems.

IMPORTANT: Acustica Audio cannot be held responsible for any loss or damage arising directly or indirectly from any error or omission in this manual.

What you get

Silver Volume C includes **36 different emulations** from a vintage, classic inspiring digital Dual Stereo Reverb/Effects Processor under the name/category 'Lex MOD200'.

NOTE:

-To facilitate understanding of the emulated hardware, where possible, we use product names already released as an Acqua plug-in to aid in the identification of the original sampled unit.

-None of Silver's Volume C emulations are part of already released products; they are samples of hardware not included in any of the plug-in suites currently released by Acustica.

SPACES CATEGORY	IR
Lex MOD200	Bank 1: (Hall) 1-9; Bank 2: (Plate) 1-9; Bank 3: (Chamber) 1-9; Bank 4: (Rich Plate) 1-9.

Below we present all the emulations included in Volume C divided by 'PRESETS' Categories

PRESET NAME	IR
Lex MOD200	Bank 1: Hall. Bank 2: Plate. Bank 3: Chamber. Bank 4: Rich Plate.

NOTE:

Please keep in mind that for Silver Volume C we recommend that you calibrate your input levels to: -18dBFS = 0dBu. We suggest that you do not overload the input. This way you will avoid any unwanted distortion or unpredictable behavior due to excessive input levels.

Lex MOD200

Category: Lex MOD200

Preset: ['Lex MOD200] Hall; Plate; Chamber; Rich Plate

Located: Paride Lanciani's The Oxygen Recording Studios – Verzuolo (CN) – Italy

Description

This 'Lex MOD200' emulation recreates a vintage Dual Stereo Reverb/Effects Processor under the name/category 'Lex MOD200'. The original hardware was released between 1982 and 1985, and although only in production for a few years; this reverb found a place in many recording studios as a secret weapon, with a rich, detailed sound. This unit is considered a true hidden gem for those who can still find one, as they are tough to come by nowadays.

The 'Lex MOD200' reverb is deep and lush; it sits nicely in the mix and faithfully emulates the highly coveted reverb algorithms of the original unit, making it very appealing to today's engineers and producers.

NOTE: In addition to the intrinsic characteristics of the reverb, thanks to Acustica's technology you can also appreciate the harmonic distortion component of the unit in this faithful emulation.
