

Concrete Wall-Mount Sink Installation

INSTALLATION GUIDE

Wall Mounted Sinks

Tools

- Measuring tape
- Level
- 100% silicone
- Carpentry tools
- Pencil

Installation

1. Measure the distance between the floor and the desired height where the sink will be mounted.
2. Check for studs which the wall mount will be attached to.
3. Mark the screw holes in a manner that the wall mount is level.
4. Attach the wall mount to the stud using a wood lag bolt, use a washer in between.
5. Make sure the attached wall mount is secure and sturdy enough to withstand the weight of the sink.
6. Apply 100% silicon on the surface of the wall mount and place sink on top. Wipe any excess silicon off.
7. Wait 24 hours to let silicon dry.

Concrete Vessel Sink Installation

INSTALLATION GUIDE

Vessel Sinks

Tools

- Measuring tape
- Level
- 100% silicone
- Carpentry tools
- Pencil

Installation

1. Make sure your surface top and sink are both clean.
2. Align sink with drain hole and keep note of this measurement.
3. Apply an even amount of 100% silicone to the underside of sink and ensure a 2" - 3" gap between edge and silicone. Carefully wipe away any excess.
4. Install the drain cover and connect to the drain assembly.
5. Clean up using a mild cleaner.
